

RORY SULLIVAN

Web Developer

ABOUT

I am a full stack web developer with an eye for unique and innovative design. My background is in healthcare, and I am excited to start putting my desire to help others to work in the digital world. I graduated General Assembly's Web Development Immersive course in September of 2017.

CORE QUALIFICATIONS

Programming and Web

HTML, CSS, & SASS
JavaScript and related libraries
Ruby on Rails
Database management using SQL
Mongoose
Node

Software

Adobe Photoshop
Adobe Illustrator
Wordpress
Dreamweaver

EXPERIENCE

WEB DEVELOPMENT STUDENT

General Assembly | 2017

Completed full-time immersive web development program focused on learning best practices, front-end, back-end, and product development.

LAUNCHPAD - The first full MERN stack application I built. This app is meant as a utility for people with executive dysfunction. It lets users track, edit, and delete daily self-care tasks.

Mongoose, Express, React, Node, CSS, HTML5 and Style Component

BEER CULT - This app lets users maintain a sleek database of their favorite local breweries and beers.

HTML5, Mongoose, Express, Node, Materialize, Handlebar and CSS

GHIBLIDB - This app is a lightweight database of films produced by the Japanese production company Studio Ghibli. It was built as an exercise in using an external API, as well as React and Rails.

HTML5, React on Rails, Styled-Components, flexbox, Studio Ghibli API

CERTIFIED NURSING ASSISTANT

Comforting Arms | Feb 2015 - June 2017

Provided excellent in-home care for clients with conditions ranging from dementia, Alzheimer's disease, cancer, COPD, and more

Assisted with physical and occupational therapy, taught adaptive living skills, kept clients homes safe and generally ensured optimal comfort and safety so clients to continue to live at home.

Acted as a liaison between clients doctor, hospice care, and family to make sure clients needs were understood and valued.
